TRY IT THIS WEEK

Spend five minutes on a plan check. Write down which plan you pay for in ChatGPT, Gemini, and Claude. Match it to the table above and circle the one new thing you can use today. If you use free Gemini, recreate any Gem you rely on as a skill before October 9. Nothing to buy.

You do not need every new tool. You need to know which one earns a seat in your business, and which ones can wait. That is Recoded in real life.

Checked against public announcements on October 7, 2026. Plans and rollouts change fast, so confirm in your own account before you pay for anything. Claude 5.5 plan defaults, Pro 200 allowance numbers, and Google Vids editions are not settled by the sources.
